About ICAROS

@icarosflight     

ICAROS, founded in Munich, Germany in 2015, aims to transform the approach to fitness and gaming. By integrating training, gaming, and social competition, our products offer exhilarating and effective workout experiences.

Our objective is to combat the increasingly sedentary lifestyle in our society by providing highly motivating and health-centric training experiences.

We take pride in the global installation of our ICAROS professional systems in top-tier fitness clubs, luxury hotels, and leading orthopedic and neurologic therapy centers.

Expanding into the consumer market in 2021, ICAROS introduced the ICAROS Home and ICAROS Cloud. These innovations enable families, individuals, and athletes to enjoy thrilling gamified workouts, fostering competition and connection with the worldwide ICAROS community.

References

Lanserhof at The Arts Club, London, Uk

A world-class gym combined with the most innovative medical treatments from the World's leading experts – Lanserhof at The Arts Club is located in the middle of the famous Mayfair district of London. The focus is on an integrated, holistic approach to increasing well-being under medical supervision. Lanserhof at The Arts Club offers members an unrivalled approach to physical fitness.

Vivamayr Medical Spa, Altaussee, Austria

Surrounded by breathtaking countryside with a magical lake and fabulous mountain scenery, all those who are on the search for recovery, relaxation and health will find the perfect conditions in which to activate both body and spirit here in Altaussee.

7 Pines Resort, Ibiza, Spain

The high-quality equipped fitness area of the 7 Pines Resort stands out with a motivating view over the open sea and carries you weightlessly to new heights of physical fitness. The setting includes two ICAROS Pro devices with a personal trainer on request.

MS 1, MS 2 and MS 7 TUI Cruises

The Mein Schiff 1 is a cruise ship of the shipping company TUI Cruises. It was put into service in 2018, has a length of about 316 meters and is approved for 2894 passengers. An ICAROS Pro set-up accompanies the Mein Schiff 1 throughout all it's journeys across the oceans. Since 2019, ICAROS is also part of the newly build Mein Schiff 2.

SRH Gesundheitszentrum, Döbel, Germany

This top-notch medical rehabilitation center is located in the picturesque setting of the „sun island“ Döbel. The SRH Clinic is dedicated to a comprehensive approach, which includes physical rehab, nutritional advice and psychological support.

SHA Wellness Clinic, L'Albir, Spain

The SHA Wellness Clinic is a beacon of medical innovation, natural therapies, and healthy nutrition, all geared toward helping people live longer and better lives. In recognition of their exceptional commitment to wellness, SHA was recently honored with the title of World's Best Wellness Clinic of 2022.

Hessingpark Clinic, Bavaria, Germany

The Hessingpark Clinic is a center for conservative and surgical orthopaedics. The high medical quality of the Hessingpark Clinic is the result of consistent specialization and an intensive international exchange of experience. Their treatment concept is rounded off by the departments for magnetic resonance imaging and therapy and training.

Palazzo Fiuggi Wellness Medical Retreat, Italy

Palazzo Fiuggi Wellness Medical Retreat is located on an ancient hilltop in a private 8-hectare park, just 50 minutes away from Rome. The culmination of years of scientific and medical research, innovative protocols development and a team of experts learning how to strengthen one's immune system and cellular regeneration of the body and mind, to maximise your health and wellbeing.

Patients' Feedback

Discover how ICAROS workouts are helping stroke patients make remarkable progress. These inspiring stories show individuals overcoming challenges to regain strength, mobility, and coordination using ICAROS training devices. Hear what they say about their journey with ICAROS.

»» *As soon as I train with the ICAROS Health, I'm in a different world. I see and feel that I am floating and forget the effort of the movements. This allows me to train my body in a completely different way than with conventional therapy. I still notice the activation of the muscle groups "on the weak side" days later.* ««

-Katja
Stroke Patient

»» *I've been training regularly with ICAROS for six months now. After just a few weeks I've noticed an improvement in my balance and my walking speed has increased significantly. The fun I have with ICAROS training motivates me to give my best every time.* ««

Sandra-
Stroke Patient

»» *„Paralyzed on one side after my stroke 8 years ago, I flew down the Swiss mountains with ease like a bird, a moment I will never forget, a moment of freedom after so many years of limitations.“* ««

-Walter
Stroke Patient and ICARACE Pilot

The NEXT software, used in combination with the ICAROS Health device, offers a tailored exercise program for individuals suffering from neurological traumas or illnesses. Understanding that each healing journey is unique, NEXT adjusts its difficulty level for each user based on their individual performance.

NEXT software, integrating gamification and virtual reality with core training, offers a supportive tool in neurorehabilitation. It aims to assist in neuroplasticity and potentially aids in reactivating paralyzed body areas. The software also focuses on improving core strength, which helps in compensation and

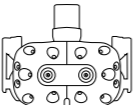

physical performance. Developed with input from therapists and patients, NEXT employs self-learning algorithms to adapt tasks to each patient's progress, providing a tailored approach to rehabilitation.
