

Have you ever flown through the Alps during your workout?

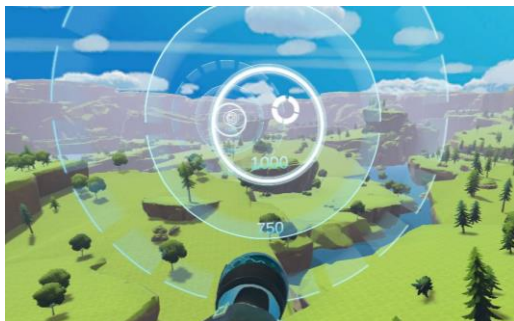

ICAROS combines effective training with unique virtual reality experiences.

Increase your treatment success in ortho and neurorehabilitation by motivating your patients with the ICAROS Health. While your patients go through an effective training, they experience impressive flights through virtual worlds and photorealistic landscapes. With VR goggles or a tablet screen.

Interactive flights through photorealistic landscapes, here through Engadin.

More motivation and success for your patients

Machine-based exercise can be monotonous. With the ICAROS Health, you increase your patients' motivation for training. Through purposefully designed games, the workout is diverse, varied, and measurable.

The ICAROS NEXT software adapts gradually to the users' progress and increases training success in a playful way. The ICAROS Health system is well-suited for people with physical limitations.

What are the effects of training with ICAROS Health?

- Strengthening of the core muscles
- Training of coordination
 - Balance
 - Reaction
