

ICAROS Games

Experience exciting and motivating exergames for training and therapy with ICAROS!

Virtual worlds, total immersion

Fly through the air, dive into fascinating underwater worlds, or compete in live races with ICAROS pilots worldwide. Our games offer a variety of game modes, different difficulty levels, and flexible playing times. All apps are compatible with various VR headsets, tablets, or screens.

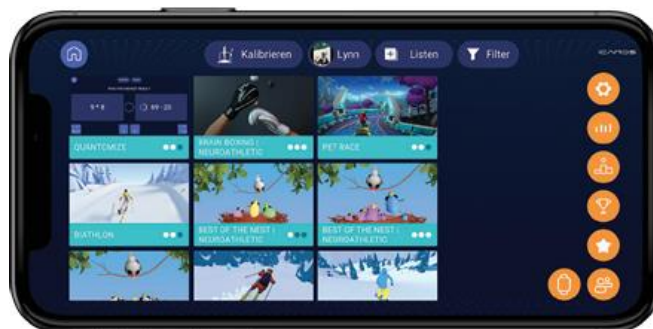

The right game for every goal — and every age

With ICAROS, you get more than just equipment—you get real experiences. Our ICAROS games make training in VR, on a tablet, or on a screen exciting, entertaining, and effective. There is a suitable game for every age group and every training goal: from a playful introduction to targeted health training to thrilling competition and performance experiences. At ICAROS, the fun of the experience is always at the forefront.

ICAROS APP

The ICAROS app is compatible with all ICAROS systems and offers a wide range of exergames for rehabilitation and training. It supports cardio, balance, coordination, anticipation, and cognitive-motor training as well as stability exercises—ideal for rebuilding motor skills and promoting functional movement patterns.

Biathlon

Biathlon trains your endurance and cardiovascular fitness.

XRSki

XRSki improves balance and stability and trains anticipation.

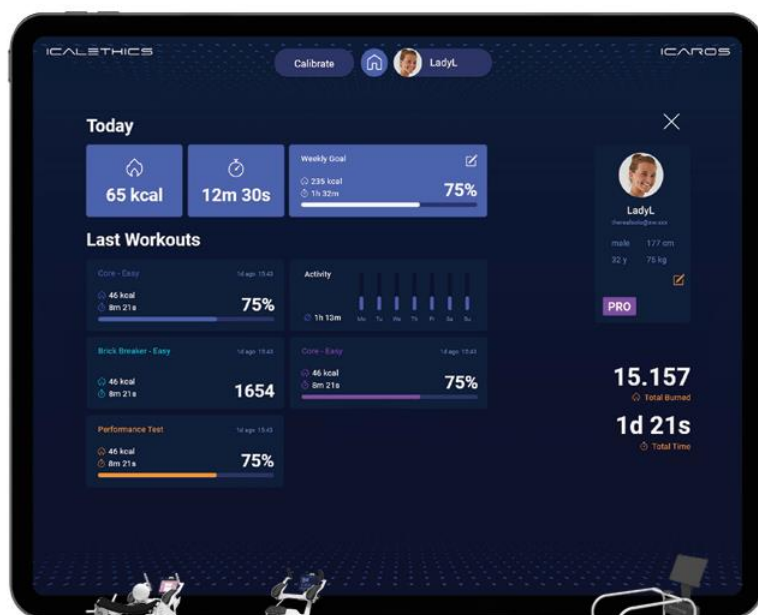

Brainboxing

Trains cognitive abilities and reaction skills in a playful way.

Predator & Prey

Complete an intense HIIT session and improve your movement control..

The **ICAROS app** is packed with full-body workouts, games, and courses that activate and strengthen all muscle groups. Regular updates with new content and exergames provide even more variety and motivation. In addition, the app enables tests for coordination, balance, and stability to measure therapy success. Therapists and trainers can create individual playlists for specific goals.

Flexible memberships: monthly, yearly, lifetime
Compatible with any ICAROS device.

Real landscapes

Virtual reality

Experience the world's most impressive landscapes in virtual reality with ICAROS. Thanks to our collaboration with 3D Reality Maps, you can immerse yourself in the fascinating panoramas of the **Engadin**, **Berchtesgaden**, and the **Dolomites**.

Fly over majestic mountains, through wide valleys, and marvel at the beauty of nature—as realistically as if you were really there. This unique experience combines the thrill of flying with breathtaking landscapes and lets you discover the world from a completely new perspective.

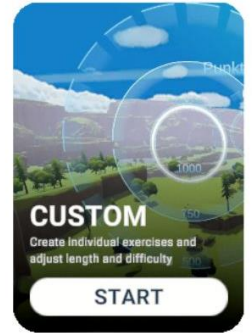

Experience the Alps in free flight. Feel the adrenaline rush of a wingsuit jump, glide through impressive mountain landscapes without time limits, or discover cultural and geographical highlights from an eagle's perspective. Action, freedom, or relaxed gliding—each tour offers an intense, realistic experience with breathtaking panoramas.

EVOLVE

ICAROS Evolve provides you with comprehensive training software that combines various therapy and training goals in one system — from neurological rehabilitation to functional core training.

Choose from three training areas

ICAROS Evolve thus enables standardized, traceable, and flexible training control—for measurable progress and professional integration into modern therapy and training concepts.

New in the Custom section:

An integrated route configurator that allows training routines to be tailored precisely to performance level, objectives, or therapy plan.

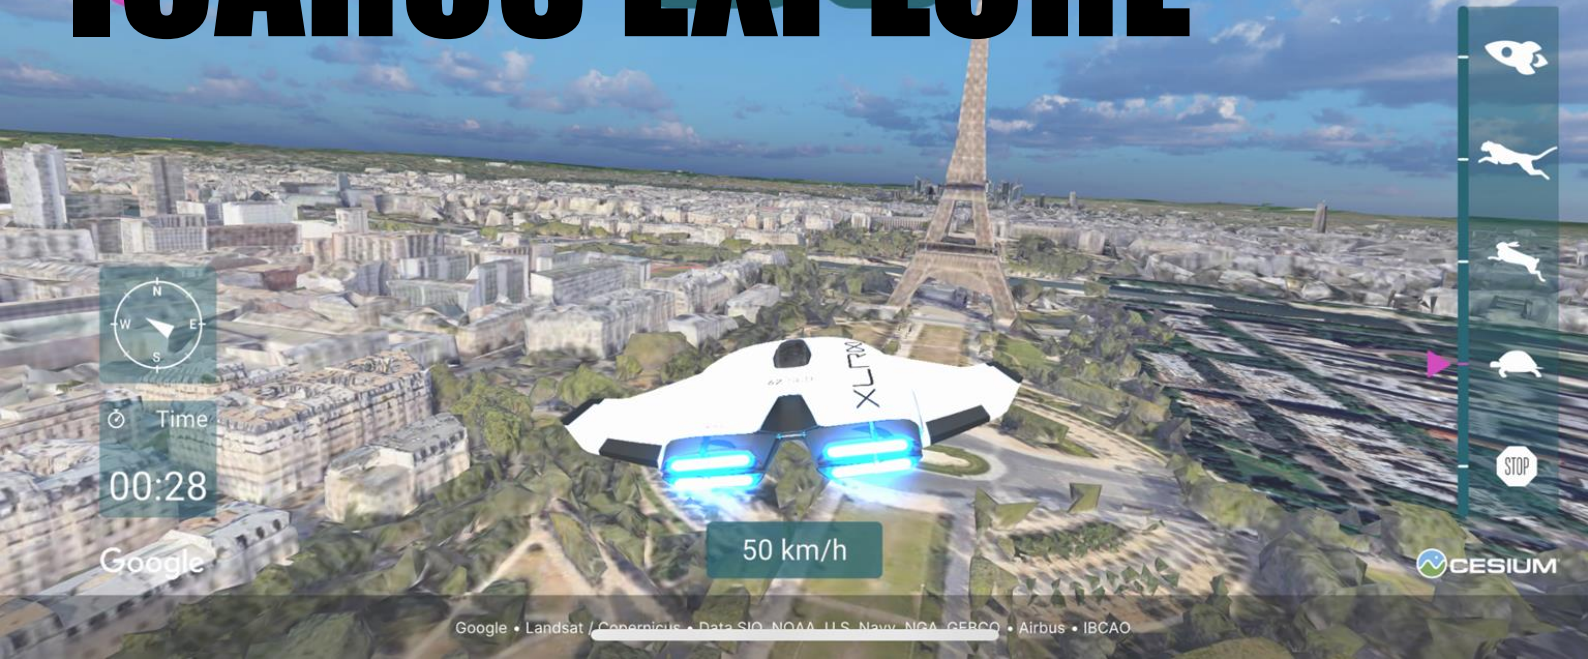

PDF export of training statistics

The progress made by trainees or users can be easily documented and shared—ideal for monitoring progress and communication.

ICAROS EXPLORE

ICAROS

Discover the world with ICAROS Explore!

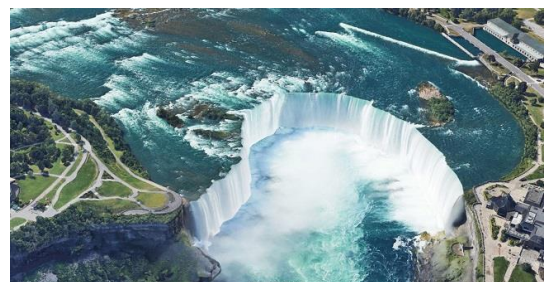

Immerse yourself in a unique exergaming experience with ICAROS EXPLORE! Explore breathtaking landscapes, fly through the skyscrapers of Manhattan, or discover the hidden secrets of Rome and Venice—right from your ICAROS device. Thanks to Google's 3D Tiles technology, you can experience realistic environments on mobile devices or in virtual reality.

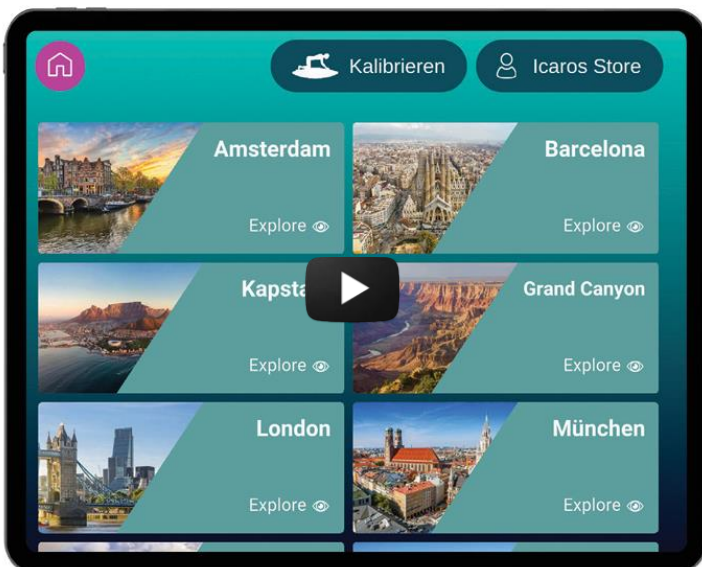

“I’VE BEEN WAITING FOR THIS GAME FOR SO LONG!”

Niagara Falls

Mt. Everest

Would you like to fly through your favorite place? Contact us for a customized 3D Tiles VR experience. Order **ICAROS Explore** via info@icaros.com.

DEEP

Explore a fascinating underwater world. Dive with sharks and whales or defend the reef against torpedo attacks.

GRAVITY

Race toward Earth in free fall from outer space. Two game modes provide you with an intense workout and demand everything you've got.

FLIGHT

The glacier landscape offers a sightseeing flight mode as well as various courses and a shooter.

AIM

Fly through breathtaking mountain scenery. Choose from different game modes and beat the high score. Ideal for beginners.

ICARACE

The global online Multiplayer

Compete live against ICAROS pilots from around the world.

ICARACE is a global, competitive multiplayer racing simulation in which players fly on the ICAROS Health and ICAROS Lightning. The competition requires body control, strength, and maximum concentration. ICARACE is available free of charge and accessible to competitors from all over the world.

ICARACE: Fitness meets eSports

In 2018, ICAROS launched the Global ICARACE Series (G.I.S) to host tournaments both online and in the real world. ICARACE develops a story of corporate-sponsored pilots in a futuristic racing league where pilots compete for fame and recognition on race tracks. Players create their own online profile and compete against each other to set records on a wide variety of tracks.

If you achieve a **top 10** ranking, you can also qualify for a world championship in the real world.

Would you like to join us? [Click here!](https://shop.icaros.com/) Get the necessary equipment here : <https://shop.icaros.com/>

ICARACE can be downloaded and played for free. A subscription (€116 per year) is required to gain full access to all vehicles and race tracks.
